DETAILED ACTION

- This action is responsive to the following communication: Nonprovisional application filed on 6/23/03.
- Claims 1-26 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 25-26, drawn to a method of printing data onto a disk label, classified in class 358, subclass 1.1.
- II. Claims 12-18, drawn to a client apparatus (e.g. personal computer) with web browser, classified in class 717, subclass 106.
- III. Claims 19-22, drawn to a print server, classified in class 709, subclass 201.
- IV. Claims 23-24, drawn to a printing system, classified in class 358, subclass 1.15.

Inventions I-IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because each subcombination has separate utility such as group I (claims 1-11, 25-26) is drawn to a method of printing, wherein group II (claims 12-18) is drawing to a client apparatus, group III (claims 19-22) is drawn to a print server, and wherein group IV (claims 23-24) is drawn to a printing system.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable

Art Unit: 2625

subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
